CAREER OBJECTIVE

Motivated Computer Engineer with full-stack foundations and hands-on administration of Oracle and PostgreSQL databases. Experienced in Linux system administration and eager to contribute at a forward-thinking company while continuously learning and delivering measurable impact.

WORK EXPERIENCE

November 2025 - Present

Senior Database Specialist, Innova

- Senior Database Specialist responsible for administering Oracle databases in production environments and deliver database infrastructure solutions across PostgreSQL, MSSQL, and Oracle platforms for both new and existing projects. Establish and maintains high availability and disaster recovery configurations, including Oracle Data Guard and PostgreSQL replication, to ensure service continuity across multiple sites. Executes database installations, configuration, migrations, and production deployments while maintaining performance stability, data integrity, and operational reliability in critical systems.

October 2024 - November 2025

DBA, HalkÖde

- Experienced Database Administrator with expertise in managing and maintaining PostgreSQL and MSSQL databases in the FinTech sector. Demonstrated ability in performance tuning, backup and recovery, and ensuring high availability for critical systems. Skilled in supporting business continuity through proactive monitoring, troubleshooting, and continuous process improvement. In addition to database duties, oversee Zabbix and Grafana monitoring platforms and perform Linux system administration, including server provisioning, patch management, and troubleshooting.

January 2022 - August 2024

DBA, Türkiye Sigorta

- Database Administrator with hands-on experience in managing and maintaining Oracle and PostgreSQL databases. Administered the underlying Linux environments, handling server configuration, patching and resource management. I have contributed to performance tuning (execution plans, indexing, statistics), backup and recovery, and ensuring high availability. Familiar with conducting database migrations, implementing security measures, and optimizing SQL queries for improved performance. Utilized IBM Guardium for database activity monitoring, anomaly detection, and enforcement of enterprise security policies, while supporting multiple database platforms in production environments.

2021

Intern, Infoojik (30 days)

- Developing Business Intelligence and Big Data projects.

2019

Intern, Kentkart (30 days)

- Developing systems such as automated fare collection and smart bus passenger information at the R&D center in Izmir.

EDUCATION

2025 – Present

Marmara University, İstanbul/Turkey

M.S. in Cybersecurity (Non-Thesis)

2016-2021

Yaşar University, İzmir/Turkey

Faculty of Engineering, Computer Engineering Department

B.S. in Computer Engineering

2011-2015

Bornova Anatolian High School, İzmir/Turkey

VOLUNTEER EXPERIENCES

2013 and 2016

EÇEV (civic involvement project)

- I worked with 7-13 year-olds on the math module every week for two days.

SKILLS

Databases:

Oracle, PostgreSQL, Microsoft SQL Server, MongoDB

Programming Languages:

C/C++, Java, Python, SQL, PL/SQL HTML, CSS

Languages:

English (C2)

Japanese (A1)

Turkish (Native)

Computer Skills:

Microsoft Office (MS Word, Excel, PowerPoint, Project)

Adobe Creative Suite (Photoshop, InDesign,

Dreamweaver)

MEMBERSHIP & INTERESTS

Membership:

Google Developer Group İzmir (Big Data and Artificial Intelligence)

Interests:

- history of art
- natural sciences and mathematics-based technologies • cycling
